PROFESSIONAL SUMMARY

Senior Android Engineer with 8+ years of end-to-end product ownership across fintech, banking, mobility, and telecom — building features used by tens of millions of users at Uber and Nedbank. Deep expertise in Kotlin, MVVM, Clean Architecture, and performance optimization. Consistently drives measurable impact: reduced crash rates, improved TTI, and accelerated feature adoption in high-velocity agile teams.

TECHNICAL SKILLS

Languages: Kotlin, Java

Android: Android SDK, Jetpack Compose, ViewModel, LiveData, Flow, Navigation, Data Binding, WorkManager

Architecture: MVVM, MVP, Clean Architecture, Modular Architecture

Libraries & Tools: Retrofit, OkHttp, Room, SQLite, Coroutines, Dagger 2, Hilt, Crashlytics, Firebase

Testing: JUnit, Mockito

Build & CI/CD: Gradle, Git, CI/CD Pipelines, ProGuard/R8

Practices: Performance Optimization, Accessibility, Analytics Instrumentation, Code Reviews, Agile

PROFESSIONAL EXPERIENCE

Nedbank Money App · Bengaluru, India

Senior Android Engineer (via Nagarro) | Mar 2022 – Present

Nedbank Money App — South Africa's leading digital banking platform

- Owned end-to-end development of SMA, Just Save, and CX modules, driving a 35% increase in feature adoption and measurably improving digital banking engagement.
- Architected deep linking across 8+ banking journeys, reducing in-app navigation drop-off by 20% and improving feature discoverability.
- Led ENBI Chat migration away from Kasisto SDK to an internal chat layer, eliminating a third-party dependency and cutting future integration overhead by ~40%.
- Improved app stability through systematic crash analysis and optimization, achieving a crash-free rate of 99.3% across production releases.
- Championed engineering best practices — code reviews, architecture reviews, and mentoring — raising team velocity by 25% across sprint cycles.

Uber Rider App · Bengaluru, India

Android Developer (via Accenture) | Oct 2020 – Feb 2022

Uber Rider App — global mobility platform, 100M+ active users

- Owned accessibility-focused improvements across critical rider workflows, expanding usability for users with disabilities across 5+ key flows.
- Led feature development in the Uber Help module, improving customer support workflows and issue resolution experiences at global scale.
- Built analytics instrumentation for user behavior and feature adoption tracking, directly informing product roadmap decisions for the rider experience team.
- Resolved production incidents affecting millions of users, contributing to overall app reliability and stability.

Bell Canada App · Bengaluru, India

Android Developer (via Tech Mahindra) | Apr 2019 – Jul 2020

Bell Canada Self-Service App — Canada's largest telecom self-care platform

- Built and owned customer self-service modules for plan management and usage tracking, reducing call-centre volume by an estimated 15%.
- Increased unit test coverage from 40% to 75%+ using JUnit and Mockito, significantly improving release confidence and reducing regression bugs.
- Designed scalable API-driven workflows in collaboration with backend teams to support reliable and performant self-service features.
- Mentored 3 onboarding developers, reducing ramp-up time by 30% through structured code reviews and pair programming sessions.

Simply For Homes App · Bengaluru, India

Android Developer (Manipal Business Solutions) | Oct 2017 – Apr 2019

Simply For Homes — real-estate and home loan marketplace

- Architected and built core modules — merchant listings, profile management, and loan workflows — from scratch, delivering the MVP within 3 months.
- Implemented multi-parameter eligibility calculation engine integrated with banking APIs, enabling end-to-end loan processing within the app.
- Modularized codebase, reducing feature development cycle time by 25% for subsequent releases.

EDUCATION

B.Tech – Electronics and Communication Engineering

Maharishi Dayanand University, Rohtak, Haryana · 2014
